

# SGMI SSIM SSMI

Schweizerische Gesellschaft für Medizinische Informatik  
Société Suisse d'Informatique Médicale  
Società Svizzera d'Informatica Medica  
Swiss Society for Medical Informatics

## 31. Annual Meeting of the Swiss Society for Medical Informatics

September 11<sup>th</sup> and 12<sup>th</sup> 2018, Stade de Suisse, Bern

In cooperation with Swiss eHealth Summit und HIMSS

**Leadership & Digital transformation**

## The topic

Digital Transformation is going on in the healthcare sector. Not as fast as hoped, however. Reasons behind this state of the sector are manifold. What can we expect from the journey? Where is the (current) limit and which things should be in place in every healthcare setting? Should we reset the whole medical informatics environment or should we proceed?

Independent of the size of a given healthcare setting, you will be confronted with leadership problems, interoperability hazards, legacy systems, hype innovations and very specific needs for a given microsystem.

Share your experience with a wider public, compare your setting and your results (either success stories or failures!) to evidence or experience based knowledge in other areas and enrich the 31<sup>th</sup> annual congress!

## What to submit

Innovation is a long journey going from the lab to the market. We are interested here to explore all stages of innovation projects that are related to medical IT.

### Topics tackled during the 2018 sessions

1. Practical implementation examples
2. How innovation is transforming care processes or clinical R&D
3. Involving leaders, users, patients in the process
4. Learning from mistakes
5. Bringing healthcare innovation from the lab to the market

## Why to submit

**Building your network:** Submitting a paper to the SSMI/SGMI/SSIM is the best way to get in touch with the Swiss community of medical informatics.

**Confront your idea to the market:** By presenting your work you will be able to confront against the Swiss medical IT market and understand whether your research is in line with the development of the market.

**A launching pad for your research:** For young researcher this is a unique occasion to submit their work in your native language and prepare yourself for the work at a larger scale.

**Presenting authors** can join the whole congress with no fees.

## How to submit

Submit your **non-commercial contribution** in English or your native language on [www.medical-informatics.ch](http://www.medical-informatics.ch) (new website, new submission process, new registration necessary as of 2<sup>th</sup> May 2018).

Read carefully the instructions for authors; adding an abstract in English is mandatory. Several categories (e.g. poster, extended abstract, full paper) are offered for submissions, mention within the remark field in case you intend to apply your submission specifically as congress contribution. Submissions will be reviewed by the congress committee and selected e.g. for oral presentations or the poster session. Awards are given for selected contributions.

## Until when to submit

Submission deadline is June 17<sup>th</sup> 2018
